EXPERIENCE

Photixa | *(Reactjs, CSS, Framer Motion, Firebase)*   *Jan 2022*
[Live](#)
- Photixa is a **Firebase**-based **storage provider backed by Google** to store all your data in one place. The objective of this application is to integrate with **cloud Firestore** and allow users to store data on the database.
- Executed over **400+** lines of code. Here custom hooks have been utilized to seamlessly store and fetch every **snapshot** of the database and store them in order of their creation and unsubscribe when not needed, removing the overhead of frequently fetching from the database.
- Upgraded to a **Progressive web application** (PWA) providing a secure HTTP connection and can be easily installed on various devices.

Travel Buddy | (Reactjs, RapidAPI, GoogleMapReact, CSS, MaterialUI)   *Dec 2021*
[Live](#)
- Successfully providing recommended places nearby or around the world. The main objective of this application is to suggest popular **Restaurants**, **Hotels**, and **Attractions** by accessing users' **geolocation** on the permit.
- Executed **800+** lines of code. Programmed all frequent search hassle solutions for easing the search process, with over **20+** hotels, restaurants, and attractions in **real**-**time** on **GooglMapReact** while it also delivers current **weather status**.
- Enhanced user experience by implementing **search functionality** to quickly **navigate** around the world.
